We're a network of native plant enthusiasts working together to...

- ✓ Collect, prepare, and propagate plant seeds native to Indiana.
- ✓ Increase the presence of ecologically appropriate native plants in Indiana landscapes.
- ✓ Create communities of knowledgeable volunteers and professional growers.
- ✓ Inspire them to responsibly propagate native plants from seed.

**NATIVE SEED**

A Project of the Indiana Native Plant Society

# Indiana Native Seed Communities

## Expanding Access to Seed-Grown Indiana Natives

- Native Seed Communities actively participate in expanding native plant populations in all landscape settings to restore habitat, support biodiversity, and mitigate the impacts of climate change.
- Our resources demystify the process of growing native plants from seed.
- Our groups of trained volunteers collect and prepare native seeds and plants to share within their communities.
- We support the Indiana Plant Conservation Alliance by making available responsibly sourced wild-collected native seed.
- We facilitate and encourage native plant seed swaps, fundraisers, and donations to public gardens and preservation projects.
- We welcome people from all walks of life and at different stages in their understanding of native plants and seed propagation. Participation is free.

## Want to Join In?

- Sign on to our Facebook group, Indiana Native Seed Communities.
- Visit our web page at [IndianaNativePlants.org/growing-native-plants-from-seed](https://IndianaNativePlants.org/growing-native-plants-from-seed).
- Reach out to our Indiana coordinator at [seed@IndianaNativePlants.org](mailto:seed@IndianaNativePlants.org).
