Species Sightings by Latin Name

Date _____ Team _____

County _____

This Checklist is a compilation of species that might be seen in bloom somewhere in the state during the count period of April 1 through May 31. For those observed but not on the list, please write them in on the blank spaces. Keep a separate list for each county visited.

A Few Reminders... Be certain to acquire permission when visiting private property. On public land familiarize yourself with the property regulations. In most cases you are required to stay on marked trails. Avoid visiting sites with fragile ecosystems and trampling tender vegetation. Do not seek out threatened and endangered species, but if discovered do not publish location information, especially on social media sites. Send completed forms (Species Sightings [one per county], Sponsor Summary, and Team Roster) with checks to Barbara Homoya, 529 Hornaday Road, Brownsburg, IN 46112.
